

Save Time and Money with PrePass Tolling & Violation Management

INFORM™ Tolling delivers deeper data into your tolling costs:

Ability to view toll charges year-over-year

Use to compare your toll charges from last years timeframe.

GPS Toll Verification

Gain confidence that tolling charges are billed accurately.

Tolls Incurred

Overall, by tolling agency, open and completed toll disputes.

Max Tolls

Total identified to date as well as potential Max toll savings.

Unassigned Transponders

Add missing vehicle information.

Visibility into Data-based Tolling Trends

- It's important to not only stay on top of your current tolling charges, but to be able to compare them against the previous year. Are your tolls increasing year-over-year due to an increase in customers, or are you experiencing unexpectedly high tolling charges?
- The INFORM™ Tolling dashboard provides quick reference for current and historical tolling charges, as well as ability to easily find detailed information. You can even set alerts for when unassigned transponders incur a toll charge, tolls exceed a threshold amount, or for charges incurred at a specific tolling agency.

GPS Toll Verification

- GPS Toll Verification helps customers verify when and where their vehicles entered a tolling plaza and generated a toll charge.
- Use GPS data from the PrePass Mobile App, your telematics service provider or API.

Toll Disputes

- Having this information easily available on the dashboard makes it easier to make informed decisions that can affect your operations and overall profitability.
- PrePass can file a toll dispute on your behalf and manage it until it's resolved.

Max Tolls

- When a toll agency has record of a vehicle entering/ exiting a toll road but no record of exiting/entering, a maximum or 'max' toll for the full length of the road is charged.
- View comparisons of max toll charges from the previous month and keep track of max tolls that are pending, in progress or complete.

Potential Max Toll Savings

- View potential toll savings based on successful resolution of Max Tolls.
- Based on max tolls identified, INFORM™ Tolling uses data analytics to calculate a customer's potential max toll savings if successfully disputed.

Unassigned Transponders

- Toll charges triggered by transponders that aren't currently assigned to vehicles is important to track, and it's easy to view current charges as well as find detail behind these charges.
