

The PrePass App

PrePass introduced weigh station bypassing more than 25 years ago using RFID transponder technology. While still in use today, PrePass also offers the ability to bypass weigh stations with a mobile app. The PrePass app provides the **flexibility and convenience** of mobile bypassing plus **integration** with various telematics and navigation systems along with visual **driver safety ALERTS™**.

Use the PrePass app either with or without a transponder. When paired with a transponder, you get the most weigh station bypass opportunities possible along with electronic toll payments and bypassing at third party bypass provider locations.

When you use the PrePass app, you'll receive these important benefits:

- **OPTION TO USE THE APP** with or without a PrePass transponder
- **EXPANDED BYPASS OPPORTUNITIES** with greater location coverage
- **INTEGRATIONS** with select ELDs, telematics and navigation devices
- **PREPASS ALERTS** warn drivers of safety hazards, parking and rest areas
- **COMPATIBLE** with both iOS and Android smart phones and tablets
- **FREE ACCESS TO INFORM** safety score management software
- **USE THE APP, TRANSPONDER OR BOTH** for one low price

The PrePass app works with your current systems, your way.

PrePass saves you time, fuel and money, and the app brings those benefits to an increasing number of devices. First, you can download the PrePass app on Android and iOS cellular phones and tablets. Second, the PrePass app also integrates with devices from trucking technology providers such as Garmin, Geotab, Omnitracs, Samsara, Zonar and more.

And just like all PrePass services, we back the app with the same excellent customer support you've come to expect from the most established and trusted weigh station bypass provider in the country.

ALERTS™ Included.

The PrePass app alerts drivers to approaching weigh stations, but it does so much more. With PrePass ALERTS, drivers also receive proactive visual and audible notifications of:

- Work Zones
- Traffic Incidents and Crashes
- Dangerous Slow Downs
- Traffic Congestion
- Truck Parking
- Steep Grades
- Gusty Wind Areas
- No Commercial Truck Roads
- Rest Areas
- Brake Check/Chain-Up Areas and more!
